4/9/2025 1:41:12	24241079	Ehsanul Haque Ome	Blood Donation Platform	1. Token-based authentication using JWT. 2. Role-Based Access Control (RBAC). 3. Donors can donate blood by responding to recipients' posts or attending events. 4. Recipients can create posts to seek blood or join events to collect blood directly. 5. Proper input validation. 6. Users can edit their profile information. 7. Proper management of post and profile ownership. 8. Accurate handling of blood compatibility and donation validity. 9. Proper management of post confirmations, event participation, and blood collections. 10. Admins can delete users, create and manage events, and delete posts. 11. Fully functional filtering and sorting for posts, users, and events.	Event Management System	Secure registration, login, and different system views for admin, organizers, and attendees with appropriate permission levels for each role. Event submission by organizers including details, capacity, and pricing, with administrative review and approval before publication. Predefined event categories with tracked success rates to inform future approval decisions and provide insights on event performance. Both free and ticket gated events are available for attendees. Organizer and attendee Reputation is measured based on event success rates and attendance reliability (showing up for registered events) respectively. Event reports for both admin and organizer roles. Fixed commission payments to admin after event completion and admin can track-adjust commissions. Search functionality with appropriate filters to help attendees find relevant events. Organizers can track registrations, manage check-ins etc. Post-event ratings from attendees which contribute to reputation scores of organizers. Platform management features for admins including user, organization and event management . [1]	Accepted Idea 1	Role has to be user and admin No role for donar and recipient DB need to change accordingly. No. of blood unit required should be mention in the post and only that amount of donar is accepted for the post. For event if donar exists in the system admin can directly add them in donation list otherwise donar account need to register 1st and then donation need to be done. Reporting 1. Event success reporting 2. Recipient post success reporting.
4/7/2025 19:31:53	22341082	Md Sakib Sadman Badho	Students Space - Temporary House Rent for Students	1. Student and homeowner authentication and verification by uploading a student ID, parent's or own NID, and a utility bill. Use of an API to receive an OTP during login. 2. Student panel (rent a house, select duration, manage payments, and plan meals). 3. Guardian panel (same features as the student panel, but can create and manage up to 5 student accounts). 4. Homeowner panel (can list rooms, view bookings, and track earnings). 5. Helpline contacts and Google Maps API to locate nearby restaurants and shops. 6. Search functionality to find suitable housing. 7. Admin panel (if time permits).	Parkit - Temporary Parking Rent	1. Car owner and homeowner authentication and verification by uploading a driving license, NID, and utility bill. Use of an API to receive an OTP during login. 2. Car owner panel (can rent a garage by the hour based on location, cost, and space). 3. Homeowner panel (can list their garage, and view bookings and earnings). 4. Integration of Maps API and Car API. 6. Search functionality to find a suitable garage. 7. Admin panel (if time permits).	Accepted Idea 2
